DETAILED ACTION

Reasons For Allowance

1. Claims 1-7 are allowed.
2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of a learning system as claimed by Applicant. Specifically, Applicant teaches the updating of the state representation for the hypothetical learning task using a default target value for the training instance.

The closest prior art of Thaler (U.S. Patent Number 5,659,666; dated 19 August 2004; class 706; subclass 016) teaches communicating accumulated state information between tasks in a learning system, but fails to teach or suggest the updating of the state representation for the hypothetical learning task using a default target value for the training instance. To the extent that this feature is not found in the prior art cited by Examiner, the present case is held allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - A. Thaler (U.S. Patent Number 5,659,666; dated 19 August 1997; case 706; subclass 016) discloses a device for the autonomous generation of useful information.
 - B. Thaler (U.S. Patent Number 6,356,884 B1; dated 12 March 2002; case 706; subclass 016) discloses a device for the autonomous generation of useful information.
 - C. Hoffberg et al (U.S. Patent Number 6,418,424 B1; dated 09 July 2002; case 706; subclass 021) discloses an ergonomic Man-Machine interface incorporating adaptive pattern recognition based control.
